

Does your church use music outside of worship services?

► Why a Church Performance License?

While the Religious Service Exemption in U.S. Copyright law allows churches to play and perform copyrighted music *during* religious services, this exemption does NOT apply to music *outside* of services.

With the **PERFORMmusic Facilities License** by Christian Copyright Solutions, your church has the freedom to play or perform *more than 25 million* Christian and secular songs anywhere in your facilities or satellite campuses.

► What can you do with PERFORMmusic?

Play music before and after services in your foyer, café, or bookstore.

Use live and pre-recorded music at festivals, and other social and outreach events.

Perform or incorporate music during programs, classes, and youth groups.

Your license travels to satellite campuses and offsite events.

The PERFORMmusic license allows you to enhance all your church activities with music and requires no reporting.
